

BIO 5620 - Developmental Biology Course Syllabus

Winter 2017

Dr. Joy Alcedo, 2109 Biological Sciences Building

joy.alcedo@wayne.edu

(313)577-3473

Class Hours

Tues & Thurs – 4:00 PM to 5:15 PM at 2025 Science Hall

Office Hours

Tues – 12:30 PM to 2:00 PM (or by appointment to be arranged by e-mail at least 24 hours in advance)

Text: Gilbert, S.F., Developmental Biology, 10th Edition, Sinauer

Assigned research papers: posted on Blackboard

Prerequisites: Students should have completed BIO 3070 or an equivalent Genetics course with a grade of C- or better.

Course Description and Objectives: This course introduces the student to the molecular and cellular principles behind how a single cell becomes a multicellular organism with specialized tissues and organs. The students will learn

- (1) to ask the key questions in development
- (2) how cells communicate in promoting the development of a multicellular organism
- (3) how the body plan of a multicellular organism is patterned to give rise to specialized tissues and organs
- (4) to appreciate the conservation of the molecular and cellular principles across different species
- (5) how the external environment can influence the developmental process, and
- (6) to analyze and integrate the scientific data that are used to answer all these questions in development.

To meet these objectives, the course is divided into 7 units, which address the key questions in development. Developmental biology is a fascinating field that has benefited from major advances in cellular and molecular genetic approaches that include functional genomic and computer-based technologies. These advances allowed present-day developmental biologists to start answering the fundamental questions raised in the past centuries by developmental biologists gifted with keen powers of observation and imagination. The seminal findings of these past and present scientists have revolutionized many aspects of our society, including the treatment of many diseases, like different types of cancer or neurological disorders. This course hopes to impart the same excitement these scientists have experienced in their quest to find the answers to the major questions of this field.

Unit I: Introduction to Development (*Topics: key questions in development, life cycles, cell specification, differential gene expression and model organisms*)

Unit II: Cell Communication in the Context of Development (*Topics: extracellular/intracellular signaling pathways*)

Unit III: Pattern Formation (*Topics: polarity, axis formation and cell differentiation*)

Unit IV: Morphogenesis (*Topics: growth and division, organogenesis, cell death, sex determination*)

Unit V: Stem Cells (*Topics: embryonic and adult stem cells, regeneration and aging*)

Unit VI: Environmental Influence (*Topic: developmental plasticity*)

Course Schedule:

Week	Lectures	Unit Topic	Class Topic	Reading Assignment
1	Jan 10	<u>I. Introduction to Development</u>	Key questions in development	Ch. 1
	Jan 12		Fertilization	Ch. 4 (pp. 117-140)
2	Jan 17		Cell specification (differential gene expression)	Ch. 2 (31-33; 47-68)
	Jan 19		Cell specification (metazoan body plans): <i>Xenopus</i>	Ch. 5 (152-161); Ch. 8 (241-260)
3	Jan 24, Jan 26	<u>II. Cell Communication</u>	Cell signaling: induction and competence Paracrine and juxtacrine signaling; extracellular matrix	Ch. 3
4	Jan 31	<u>III. Pattern Formation</u>	Axes formation: <i>Drosophila</i> – anterior-posterior polarity; dorsal-ventral polarity	pp. 107-115; Ch. 6 (186-194)
	Feb 2	Exam I		
5	Feb 7	<u>III. Pattern Formation (continued)</u>	Segmentation in <i>Drosophila</i> Homeotic genes	Ch. 6 (194-214)
	Feb 9		Research paper discussion	Cooper et al, Nat Genet 2003
6	Feb 14		Axes formation: Mammals Hox code hypothesis	Ch. 9 (309-317)
	Feb 16	<u>IV. Morphogenesis</u>	Vertebrate neurulation, neural tube patterning	Ch. 10 (333-345)
7	Feb 21		Somitogenesis and neural crest cells	Ch. 11 (375-393)
	Feb 23	Exam II		
8	Feb 28	<u>IV. Morphogenesis (continued)</u>	Limb bud formation	Ch. 14 (489-498; 502-510)
	Mar 2		Developmental control: tissue growth (Hippo pathway) and body size (insulin pathway)	Pan, Genes Dev 2007 Shingleton, Curr Biol 2005
9	Mar 7		Research paper discussion Cell death programs	Conradt and Horvitz, Cell 1998 Ch. 3 (94-95)
	Mar 9		Sex determination	Ch. 15 (532-541)
10	Mar 14, Mar 16	No classes	Spring break	
11	Mar 21		Research paper discussion	Rezaval et al Curr Biol 2016

	Mar 23	Exam III Review		
12	Mar 28	Exam III		
	Mar 30	<u>V. Stem Cells</u>	Germ cells; embryonic cells Adult stem cells (Blood: hematopoietic stem cells)	Gilbert, pp. 319-328 Wilson and Trumpp, Nat Rev Immunol 2006
13	Apr 4		Regeneration	Ch. 16 (568-578)
	Apr 6		Research paper discussion	Beauchemin et al, Development 2015
14	Apr 11		Aging	Kenyon, Cell 2005
	Apr 13		Research paper discussion	Maures et al, Science 2014
15	Apr 18	<u>VI. Environmental Influence</u>	Developmental plasticity: <i>C. elegans</i> Research paper discussion	Fielenbach and Antebi, Genes Dev 2008 Kim et al, Science 2009
	Apr 20	Final Exam Review		
16	Apr 25	STUDY DAY		
	May 2	FINAL EXAM	2.45 PM - 4:45 PM in 2025 Science Hall	

(Note: The course schedule is subject to change if circumstances arise that would require such changes. Any changes will be announced to the whole class and posted on Blackboard.)

Dates to be aware of:

Jan 15	Last day to add
Jan 23	Last day to <u>drop and receive tuition refund</u>
Feb 5	<u>Deadline to drop with no record of enrollment.</u> After this date, students who drop the course will receive WP or WF on their transcripts.
Mar 26	Last day to withdraw. After Mar 26, a <u>letter grade</u> will be issued.

Reading assignments: The reading materials associated with each lecture are listed above. In addition to the Gilbert textbook, they will be derived from research papers or review papers that are posted on Blackboard under the folder “*Additional reading assignments*”.

Class Web Site:

Go to Pipeline and Blackboard [<http://blackboard.wayne.edu/>] to access the class web site [Winter 2017 BIO 5620 Sec 001.501 (COMBINED)]. This site has the syllabus, additional reading assignments and lecture slides. CHECK this site OFTEN: it is continuously updated with (1) new class materials and (2) announcements concerning the class, e.g., lecture materials and exams. In addition, you should be able to access through this site (1) all recorded lectures from the Echo Center and (2) the Discussion Board

that will allow you to post concepts and questions that you want clarified. The instructor will check the Discussion Board often to reply to your posts. This Discussion Board can be a very important supplement to your understanding of course materials.

Quizzes: There will be **6 quizzes**, which will be administered randomly (*i.e.*, “pop quizzes”) throughout the Winter Term. Each quiz is worth 12.5 points. The students have the option to drop two quizzes. **No make-up quiz** will be given under any circumstances.

Exams: There will be **3 closed-book mid-term exams** and **1 closed-book comprehensive final exam**. Each exam will be derived from class lecture materials and the reading assignments. Thus, students are expected to know **both** sets of materials prior to each exam. **Each mid-term exam will be worth 100 points** and the mid-term exam with the lowest score will be dropped. In contrast, **the final exam, which is also worth 110 points, cannot be dropped, *i.e.*, the final is mandatory**. **The final exam will also be cumulative.**

Make-up exams will not be given. Exams will begin promptly. Students arriving late to an exam will not be given additional time to finish the exam. No students will be allowed to leave and re-enter the classroom once an exam has begun. No students will be allowed to enter the exam room after a student has completed the exam and left the room. **Students arriving more than 15 minutes late for an exam will receive a grade of 0 for that exam—no exceptions.**

The room in which all exams will be held will be the same as the regular classroom. All you need is a few sharp (#2) pencils to fill your name, ID number and answers on your answer sheet (e.g., Scantron). The Scantrons will be distributed at the beginning of each exam.

Research paper discussions: The class will be divided into 6 groups, and each group will be responsible in presenting an assigned research paper. Assigned research papers for presentation are posted on Blackboard under the folder “*Research papers for presentation*”. The research paper presentation will be worth **40 points** for each member of the group. If a member provides no contribution to the group effort, then said member will earn no points. A documentation of individual contributions to the group effort, which should have the group’s consensus, should be submitted to the instructor.

For the presentation, which should be 45-50 minutes long, the group should demonstrate the following:

- a. Sufficient introduction to the topic (5 points)
- b. What is the question (hypothesis) that the paper is asking? Why is this question important? (5 points)
- c. How was the question answered? Or how was the hypothesis tested? (7.5 points)
- d. What were the key results that answer the question? Or what were the key results that prove/disprove the hypothesis? (7.5 pts)
- e. How has the field changed in the decade(s) after the paper has been published? Or if the paper is recently published, what are future implications of said paper? (7.5 pts)
- f. Be prepared to answer questions about the material (7.5 points)

Class participation: The course will be taught through a combination of prepared lectures and class discussions. The idea is to ensure that the students are **thinking** about the developmental process: what are the questions; how to ask and address those questions; and how to interpret any answers to such questions. Thus, participation in class discussions is highly encouraged.

Honors section: Students in the honors section will devise a research project, which will be documented in a report that has a 2000-2500 word count, excluding the reference list. The report should be divided into the following sections: an introduction, hypothesis, approach, possible outcomes, caveats and alternative approaches. The report, which will be worth **75 points**, should be submitted on Apr 20, the last day of class before the final exam. Please include the word count on the cover page of the report.

Grading policy:

In general, grades will be calculated on a straight scale, based on a **grand total of 400 points (475 points for the Honors section)**. However, the instructor may decide to use a “curve” in the required exams to achieve a more normalized grade distribution.

Grades will be calculated on the following %:

	A	92.5-100	A-	90.0-92.4	
B+	87.5-89.9	B	82.5-87.4	B-	80.0-82.4
C+	77.5-79.9	C	72.5-77.4	C-	70.0-72.4
D+	67.5-69.9	D	62.5-67.4	D-	60.0-62.4
	F	0-59.9			

Re-grading policy: Requests for re-grades should be submitted no later than one week after the quiz or exam has been returned to you. Completed exams and quizzes will be scanned before they are returned to you. Re-grading will be done on the scanned exams and quizzes. Any quiz or exam that has been requested for a re-grade, with the exception of addition errors, may be re-graded in its entirety and result in either an increase or decrease in your grade.

How to do well in class:

- (1) Attend the lectures.
- (2) Ask questions, especially if you do not understand the material under discussion.
- (3) Read the assigned material.
- (4) Take all 4 exams and the quizzes.
- (5) Work with your team to prepare for the research paper presentation.
- (6) Do not cram for the exams. The course covers a lot of material and cramming will not help you gain a solid understanding of the material, which is necessary for the exams.

Academic conduct:

The Wayne State University code of conduct (posted on Blackboard) specifically prohibits cheating and plagiarism. Anyone caught cheating or plagiarizing will automatically receive a failing grade for the quiz, exam or class. The practice of science is based on trust. In real-life terms, violation of such trust automatically leads to loss of research grants, medical licenses and careers. This should serve as a reminder that cheating and plagiarism have real-life consequences.

Academic Success Center (ASC):

The ASC, located at 1600 David Adamany Undergraduate Library, can provide counseling and workshops on how to improve study skills and time management, and thus help in successfully completing this course. These services are free of charge to all students.

Students with disabilities:

If you have a documented disability that requires accommodations, please register as early as possible with the Student Disability Services (SDS), 1600 David Adamany Undergraduate Library, Student Academic Success Services Department (313-577-1851 or 313-577-3365; TTY--telecommunication device for hearing impaired students). I will be happy to meet with you during my office hours to discuss your needs, once you have your SDS academic accommodation letters. Please be aware that a delay in getting these letters may also delay the facilitation of your needed accommodations in a timely manner. The mission of the SDS at Wayne State University is to ensure that students with disabilities have equal educational opportunities.

Religious Holiday Conflicts:

If you have a conflict with any of the scheduled class or exam times due to religious reasons, you must notify the instructor in writing within the first two weeks of classes. Otherwise, no accommodations will be made due to religious reasons after this time. Exam times have already been scheduled with certain religious holidays in mind.

Unexpected University closures:

If the University is officially closed on an exam day, the exam will be held on the next regularly scheduled class day. Closure of the University is announced by the following mechanisms:

1. the University Newslines (313) 577-5345 *
2. WSU Homepage (www.wayne.edu) *
3. WSU Pipeline (www.pipeline.wayne.edu) *
4. WDET-FM (Public Radio 101.9)
5. by other local radio and television stations

* Note: The information on closures and class cancellations is likely to be found at these locations before it is broadcasted by local radio and television stations.

Finally, any specific issue not covered by this syllabus will be resolved using University policies. Disputes that cannot be resolved following the guidelines present in this syllabus will be resolved by following the guidelines of the University "Student Due Process".
