

# Peregrine Falcon Facts

**1** They are the fastest animal on the planet and have been recorded at more than 240 mph!

**2** Pairs mate for life and will return to the same nesting site, year after year.

**3** They eat other birds (the WSU falcons **love** pigeons and killdeer).

**4** Peregrine falcons do not use sticks for their nests. Instead, they scrape out depressions on high cliffs.

**5** Their biggest threats are humans and larger birds of prey.

**6** The WSU Falcons have hatched 25 chicks since the Falcon Cam was installed.

**7** The Falcon Cam was a gift from WSU biology alumna Michelle Serreyn. She now works for the Michigan DNR and leads the WSU Falcons conservation efforts as a volunteer.
