Mr. Ralph Nader
53 Hillside Avenue
Winsted, Connecticut

Dear Mr. Nader:

It is a pleasure to invite you to attend Wayne State University's forthcoming Centennial Symposium, Technology and the City: Human and Social Dimensions, May 7-10.

The enclosed program indicates the caliber of the men from public, industrial, and academic life who will address the Symposium. Its sessions will analyze the social implications of technical advances in transportation, communication, and energy. During the last two days of the Technology and the City Symposium, a biomechanics conference, entitled "Impact Injury and Crash Protection," will explore one of the areas in depth. I am certain that you will find the themes of the Symposium of particular moment to several of your current interests, and that we would benefit in the discussion sessions from your broad experience.

The Centennial Symposia as a whole are designed to explore fundamentally the role of an urban university in its urban society. Technology and the City is the sixth Centennial Symposium and third devoted to scientific subjects. If you wish, I should be happy to provide more information on the Centennial Symposia.

I speak for President William R. Keast in extending to you the invitation of the University, and look forward to your affirmative reply.

Sincerely,

Philip Borden
Assistant Director
Centennial Symposia

Dear Professor Skinner:

It was a rare treat for us, as engineers and physical scientists, to have you give a rousing finish to our week-long symposium with your address on communication. We were delighted to have an appreciative audience filling the room. Thank you very much for participating.

Yours sincerely,

H. K. Livingston
Professor of Chemistry
