

Wayne State University
Department of Urban Studies and Planning

UP 6570 – Local Economic Development: Implementation and Finance
Fall 2022
Thursdays, 5:30 – 8:15pm
0010 Prentis

Prof. Alaina Jackson
3213 Faculty/Administration Building
Phone: 313-949-2412 (o) 915-539-1948 (c)
E-mail: alaina.jackson@wayne.edu
Office hours: by appointment via Zoom or phone

Course Overview:

Though news headlines might tell a different story, state and local economic development is about far more than high-profile fights over Tesla assembly facilities and Amazon corporate offices. Economic development planning can also support small business formation and growth; contribute to broad-based vision of regional economic development strategy; promote inclusive outcomes; channel resources to the development of physical, human and organizational assets that sustain and vitalize places. The goals of this course are to 1) expose students to relevant economic theories and concepts relevant to local/state economic development practice and to the conditions that shape the challenges, opportunities and trajectories of communities, especially in Michigan; and 2) introduce and critically review a range of financial tools, actors in the field and implementation approaches commonly in use in local economic development in Detroit, in Michigan and in other regions of the USA. What matters is not only the specific tools and financial mechanisms that are in play, but also how they are implemented and combined to pursue targeted objectives.

The course operates in a structured seminar format. Most of our time will focus on a set of economic development finance tools and some approaches to their implementation that are commonly pursued in the field, using a combination of guided classroom discussion of assigned readings, in-class activities and student presentations of case study material. Case studies will enable students to consider the particular context, as well as specific challenges, to policy design and implementation. In addition, this case study component will be structured to encourage students to develop skills in case study research design, writing and analysis.

The first weeks of the course will briefly introduce students to the field of economic development and its intellectual traditions, but this course is not designed to provide an in-depth review of foundational economic development theories and current trends. Students are therefore encouraged to take UP 6550 State, Regional and Local Economic Development Policy and Administration, in order to round out their understanding of underlying theoretical and historical influences in this field.

Learning objectives:

Students who successfully complete the class will be able to:

- explain basic elements of economic development finance – grants, tax rebates, loans, guarantees, equity – and the role of each in policy design;
- exhibit familiarity with key economic development finance tools and programs available to Michigan communities;
- understand the toolbox for identifying strengths and weaknesses for a community's economy;
- describe how various ED policies and goals are implemented through projects and programs, and the pros and cons of different approaches and levers of agency for planners;
- evaluate economic development policies, implementation processes and situations as case studies, and draw practical and transferable lessons from them.

Readings:

Reading assignments are detailed in the attached syllabus.

The required textbook for the course is Planning Local Economic Development:

Leigh, N. G., & Blakely, E. J. (2017). *Planning Local Economic Development: Theory and Finance, 6th ed.* Thousand Oaks, CA: SAGE.

Additional assigned readings will be available on the course Canvas page or via links in the syllabus. All readings are required and should be completed before the assigned session unless otherwise noted.

Requirements and Grading:

1. Case study analyses x 1 (20%)
300-500-word reflections about a week's case study reading(s), to be posted on Canvas by the night before class. These reflections should clearly explain the core problem in the case, as well as the actions taken and lessons about what did/did not work. Complete one analysis during the semester. You will be asked to make some remarks in class about your analysis.
2. Quizzes x 3 (15%)
There will be three short quizzes during the semester to review key concepts and terminology from that week's readings. The quizzes will be administered via email at the beginning of the meeting period.
3. Case study paper (25%)
7-10-page original case study that examines, in-depth, the implementation of an economic development finance tool or policy in a particular situation or context. Further details will be provided in the second week of class and posted to Canvas. We will check in on progress and engage in troubleshooting throughout the semester.
4. Final exam (20%)
Multiple choice, short answer and essay questions
5. Class participation (20%)
Full participation is constituted by completing all assigned readings prior to class; engaging regularly in discussions through thoughtful questions and comments, both verbal and written; and giving a short overview of an implemented example of an economic development finance tool or program employed by a local or state government or the federal government which is not already covered in the class syllabus. Students will sign up for their presentation day on the first day of class.

More than two unexcused absences will negatively impact your participation grade. Given the unusual circumstances brought about by the pandemic, I am willing to be relatively flexible with absences – but please do let me know, if possible, before the class that you will miss.

The grading scale is as follows: A: 94-100, A-: 90-94, B+: 87-90, B: 83-87, B-: 80-83, C+: 77-80, C: 73-77, C-: 70-73, D+: 66-69, D: 63-66, D-: 60-63, F: 0- 60

A course grade of "Incomplete" will be granted only in exceptional circumstances and must be arranged, in writing, before the last class session.

Disability:

If you have a documented disability that requires accommodations, you will need to register with Student Disability Services for coordination of your academic accommodations. The Student Disability Services (SDS) office is located at 1600 David Adamany Undergraduate Library in the Student Academic Success Services department. SDS telephone number is 313-577-1851 or 313-577-3365 (TTY). Once you have your accommodations in place, I will be glad to meet with you privately during my office hours to discuss your special needs. Accommodations cannot be retroactively applied so please make arrangements as soon as possible.

Course Policies on Academic Dishonesty:

Academic work, like the practice of professional planning, is governed by standards of ethical conduct. **All written work that carries your name is to be your individual, original work.** Plagiarism of any kind will result in a failing grade on the assignment in question and, depending on the severity of the situation, may lead to a grade of F in the course. If you are uncertain about what constitutes plagiarism, ask the instructor before engaging in the questionable behavior and/or consult the guidance provided in the University's policy statement on academic integrity at: <https://doso.wayne.edu/conduct/academic-misconduct>. This website includes a link to the Student Code of Conduct.

Schedule of Readings:

You will generally be responsible for three to five readings per class. These will typically be a mix of academic articles, policy or technical reports, and case study materials. In some cases, the case materials will include websites, which you should spend plenty of time becoming familiar with – at least to the point that you have developed some sort of take-away (I will also provide some guidance). You must come to class prepared to discuss the core points or arguments of the assigned materials. If the session has a larger number of readings or cases, I will split them between members of the class, so that you will read some but not all pieces. You are still responsible for understanding the core arguments presented by others in class.

September 1, 2020

Course introduction

- Foxconn Wisconsin case materials:
 - ReplyAll. 2016. Negative Mount Pleasant. Episode #132. Gimlet Media. Available at: <https://gimletmedia.com/shows/reply-all/wbhjwd>

- [Here and Now | Foxconn: 13,000 Jobs. \\$10 Billion. One Big Investment. | Season 1600 | Episode 1604 | PBS](#)
- [Here and Now | Foxconn in Wisconsin: Why Deal Worries This Economics Expert | Season 1600 | Episode 1604 | PBS](#)
- Bartik, T.J., 2019. Costs and benefits of a revised Foxconn project. Kalamazoo: W.E. Upjohn Institute for Employment Research. (skim)

September 8, 2020

Economic development planning: From policy to approaches to implementation

- Bartik, Timothy. 2003. Local Economic Development Policies. Upjohn Institute Working Paper, no. 03-91. W.E. Upjohn Institute for Employment Research. Kalamazoo, MI.
